

DUCTWORK CLEANING

Filtrex carry out ductwork cleaning on all types of systems. From pharmaceutical and healthcare environments, food manufacturing, public and commercial buildings, we have undertaken works in most environments.

Using specialist mechanical brushes, air jets and manual cleaning methods, Filtrex ensures a thorough clean and will disinfect where required. Access doors are fitted at strategic points to ensure the whole system is reached.

A complete pictorial report is produced, following the clean, to show before and after pictures and any possible issues that we may have found within the ductwork. The report also includes a summary of our findings and recommendation for maintaining the system on an on-going basis.
