

# H500 V-FLOW CARBON

## ACTIVATED CARBON RIGID POCKET ACTISORB

### GENERAL FEATURES:

- Structure: Polypropylene
- Media: Eff. 80% synthetic material with fine grains of activated carbon
- Sealant: Polyurethane 100% airtight
- Gasket: Half-round moulded monobloc
- Maximum T° in continuous service: 50°C
- Humidity: 70% RH

2 in 1 filter element with high efficiency particulate filtration and odour removing activated carbon. Used for filtration in airports, industrial workshops, offices and many other air purification applications.

- Can be installed as an upgrade to existing filtration
- Particulate and odour filtration
- Ideal for filtering most low concentration pollutants
- Fully incinerable

### STANDARD SIZES

Product Code	Height A (mm)	Width B (mm)	Depth C (mm)	Media Area (m <sup>2</sup> )	Flow Rate (m <sup>3</sup> /hr)	Initial Pressure Drop (pa)	Efficiency
H500/2120	592	292	292	4.3	1700	120	80%
H500/3120	592	490	292	7.5	2800	120	80%
H500/1120	592	592	292	9	3400	120	80%
