

PROGUARD DUO EPM1 70% (F8)

BAG FILTER

FEATURES

- Very strong double rolled corrosion resistant header frame
- Over 50% increased dust holding capacity
- Tested for food contact according to CE 1935/2004
- Media: Synthetic high efficiency (primary filtration) + Glass fibre (fine filtration)
- Final pressure drop: 450 Pa, recommended final pressure drop: 250Pa
- Max Temperature: 70°C
- Humidity: 100% RH

Notes: This filter offers exceptional dust holding capacity and in many instances, can eliminate the requirement for a pre-filter. The increased capacity can lead to filters lasting twice as long as standard bag filters.
